Dear Akella Sivasai,

Thank you for your interest in this year's Ericsson Innovation Awards.

Over 2000 students submitted their ideas and we were highly impressed by the original and creative solutions submitted. The judging process is a challenging task and after careful review and deliberation you will unfortunately not move forward in this competition.

We sincerely hope you will continue to develop your idea. Until then you can follow the competition on our social media channels or the [competition page](#) to see the development of the Semi-finalist teams and get inspired for next year.

Best regards,
Ericsson Innovation Awards team
